PUBLIC NOTICE

JULY 14, 2025

Dear Resident,

The Raymond Mhlaba Municipality will be implementing its Smart Electricity Metering Project within **KwaMaqoma area**. This initiative forms part of the National Treasury's RT29 transversal contract and is designed to enhance service delivery, whilst ensuring that residents can view their electricity usage and make informed decisions on electricity spend.

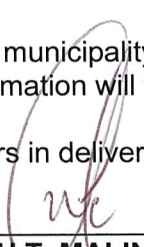

The first phase of the project will be the **PHYSICAL AUDIT** of meters within the municipal area. During the audit phase, auditors will come to your area to assess the state of your meter infrastructure.

- a. If your meter is inside your property – please allow the auditor access to your property.**
- b. The auditor will not change anything on your existing meter box – they are only there to assess the state of your meter.**
- c. Your access to power will not be affected during the audit**
- d. The auditor will collect the following information:**
 - i. Meter condition**
 - ii. Meter location**
 - iii. Meter type**
 - iv. Resident/municipal account holder details**
 - v. Municipal account number**

Once the audit process is done, the Municipality will begin with the replacement of prepaid meters with the new smart meters. This smart meter roll-out project is the first step towards Improved Service Delivery for all.

The municipality is looking forward to your cooperation throughout this project. Additional information will follow regarding rollout schedules and community engagements.

Yours in delivery service

MS U.T. MALINZI
MUNICIPAL MANAGER
